## Apartment/Roommate Questions

**Did you search for apts in the past 4 years?**

Yes

**Important features**

Price; location as close to work as possible (st louis park area); fast internet which my last one didn't have

**Least important features**

Dishwasher

**How did you find most recent apartment**

My buddy tyler found this one online but i'm not sure where, so I got recruited into it

**Difficulties with that service**

No service used

**Comments are subjective?**

Sometimes, it looks like some were like 1 star and some were 5 so I had to look for myself, but i didnt really have much of a choice anyway because tyler picked and we needed to find a place asap

**Most challenging about apartment search**

I'm busy with work so I needed to do it fast, and I didn't have much time, and i was coming from dinkytown into st louis park by my work so there honestly wasn't much thought put into it

**How did you find roommates**

Tyler has been my roommate for 5 or so years so we just have been hopping around together up until this year when I moved in with my girlfriend.

**Was it easy to find roommates**

Kind of but that's because you (Tom) put an ad out on craigslist for our third roommate when we lived in dinkytown so I didnt have to do much

**Difficult process**

Not really because you (Tom) took care of it

**What expectations do you have for roommates**

We were just looking for chill roommates who were cool with our habits

**What do you think about the roommate finding services the U offers**

Not sure I've never used them to be honest

**What did you find most challenging about your roommate search**

I had a full time job so I didn't have much time to help or interview people which is why I'm glad you (Tom) did it

**What do you wish you knew before searching**

I wish we had a third person already but that's alright it worked out great

**Conclusion**

**Thanks for being part of the interview**
